

BrakeTurbines Certified Gunite Drum

BrakeTurbines Certified Gunite Drum gives you:

Improved BrakeTurbines Performance

As a BT certified drum, the design of Gunite's 3899 allows the maximum amount of cooling, cleaning air to be blown in between the drum and friction material getting the most out of the BrakeTurbines product.

What do BrakeTurbines give you?

Increased Brake Life

Brake life improvements from 20% to 100% depending on your application.

Self Cleaning Brake Drum Assembly

Cleaner drums not only last longer, they are easier to maintain, in addition BrakeTurbines let you go without backing plates, making inspections easier and improving brake life.

Better Drum Performance

BrakeTurbines enabled drums resist brake fade and have more torque available to them, especially in high heat situations. Independent testing shows that BrakeTurbines equipped drums provide up to 18% more torque.*

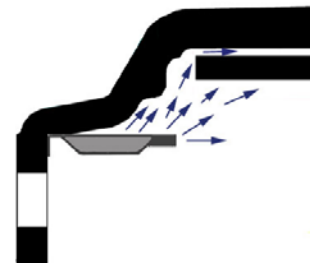

BrakeTurbines and drums are sold separately contact the manufacturers below for purchase information.

Gunite Corporation
302 Peoples Ave, Rockford, IL 61104
(815) 964-3301 - www.gunite.com

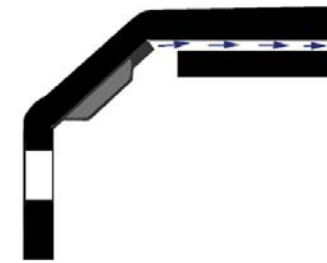

Lynnfin Truck Technologies
325 Paul Avenue, St. Louis, MO 63135
800.596.6346 - www.lynnfin.com

Non Certified Drum

When the transition from the hub to the brake surface flat is not certified, BTs still perform, just not as well.

BrakeTurbines Certified Drum

When all the air channeled by BTs is forced in between the drum and the brake, BTs performance is maximized.

**BT performance claims provided by Lynnfin, for more information got to www.lynnfin.com/test_data.htm*
